

ENERGY-SAVING ACTIONS

Maintain comfort without
compromise this winter.

Help save on energy costs this winter with helpful programs and resources.

Seal Your Home

One of the quickest energy-saving tasks you can do is caulk, seal and weatherstrip all seams, cracks and openings to the outside. This can save 10% to 20% on your heating and cooling bills.

Water Heating

Set your water heater temperature to 120°F or consider installing an on-demand or tankless heater that only heats water when you need it.

Smart Thermostat

Installing a “smart” or programmable thermostat will reduce your energy use while you are asleep or away.

Customer Assistance

Financial assistance and resources like our Equal Payment Plan and Share the Warmth program may be available during times of hardship.
